

BADGE APPS

NEW TRENDS FOR OBTAINING AND MAPPING LOCATION DATA FOR POLICE

1-DAY TRAINING

September 16, 2024
0800hrs - 1700hrs (MT)
Cost: \$150 per student

HOSTED BY BUCKEYE POLICE DEPT (ARIZONA)

ABOUT

Expanding past cell towers, where can investigators find new sources of location information to solve cases? How do geofences work and did you know Google isn't the only source? What are Advertiser IDs? How do you quickly map location data in a case?

WHAT SKILLS?

Basic Microsoft Office types of skills in Windows are all that are needed to be successful with these types of location data and training.

TARGET AUDIENCE

Law enforcement employees to include detectives, crime analysts, prosecutors and sworn officers can benefit from this training. Example offenses include murder, robbery, burglary, narcotics and fraud offenses.

INSTRUCTOR BIO

Aaron Benzick is a police detective working for a law enforcement agency in the suburbs of north Texas for over 20 years. As the founder of Badge Apps, Aaron has used his strong technical background to create unique software to solve law enforcement problems. This combination of skills has led to the successful identification and apprehension of numerous suspects in complex criminal investigations and missing person cases.

LOCATION OF TRAINING:

Buckeye PD Training Facility
8050 Shepards Trl
Buckeye, AZ 85326
